

Perch' Non Possiamo Essere Cristiani (Le Spade)

• When is a treatment considered ineffective? • How is a failed treatment diagnosed radiologically? • Is a retreatment always indicated? • What are the best solutions for correct disinfection and irrigation? • Which are the most appropriate obturation techniques in retreatments? • When should a lesion of apical origin be considered resolved? • What type of restorations may be performed in teeth with retreatments? • Which are the most appropriate techniques for the removal of endocanal materials? • Can endodontic surgery be a first therapeutic choice? • When can a post-extraction implant be performed? The ten chapters of the volume answer these ten fundamental questions and the clinician who faces an apical pathology of endodontic origin will therefore have the solutions. The aim of this text/atlas is to provide a guide to the diagnostic approach and to the execution of endodontic retreatments of complex cases. The book is enriched by over 150 clinical cases by world-famous authors of various nationalities and illustrated with a high-quality iconography, expansion boxes and decision-making algorithms that guide the professional in the therapeutic choice.

The first section of this book deals with microbiologic and pathophysiologic aspects of apical periodontitis, while the second section describes the best evidence for predictable treatment and prevention of the disease.

This book offers up-to-date information on all aspects of the use of lasers in endodontics, focusing especially on the various laser applications, including primary and permanent root canal therapies, retreatments, apical surgery and pulp therapy. Every laser technique used in endodontics is carefully described and illustrated, with detailed coverage of both conventional methods and more recent developments such as laser-activated irrigation and photon-induced photoacoustic streaming. In addition, a separate section addresses the basic science of laser dentistry, explaining the physics, describing laser-tissue interactions, and discussing different types of laser. Extensive reference is made to the international literature in order to provide the reader with a clear, evidence-based understanding of the merits of various approaches. In offering a balanced mix of descriptions of clinical applications, clinical data, scientific research and logical criticism, the book will serve as an excellent reference for a wide audience comprising general dentists as well as specialists.

This book explores the wide variety of cases in which the plural of nouns is lexical. When a plural is lexicalized it becomes part of what it is to know a certain word: pence, for example, is lexical because it means a plurality of a certain kind - a multiple value, not a set of physical objects like pennies - and knowing this reading is knowing the word. Languages exhibit countless examples of similar word-dependent irregularities in the form and meaning of plural, but these have never been analyzed in depth from a unified perspective. Dr Acquaviva aims to do just that, using analytic tools from formal semantics and theoretical morphology to shed light on the relation between grammar and the lexicon. After an introduction setting out his approach he divides the book into two parts. The first gives a structured description of the ways plurality can be lexicalized with an emphasis on description and categorization. The second analyzes in depth different types of lexical plurals in Italian, Irish, Arabic and Breton. A final chapter spells out the theoretical consequences for the analysis of the lexicon. The book is unusual in combining a broad typological classification with a unified morphological and semantic analysis based on a formal framework.

The Medici family chapel is a jewel-like room and, despite changes that have been made to it over the years, it houses the best preserved of Renaissance fresco cycles

A series of twenty poems deal with love, loss, remembrance, and the place of humans in the natural world. Dario Fo's classic farce *Accidental Death of an Anarchist* was a sensation when it premiered in Italy in 1970. Based on the story of a political activist who "fell" to his death from the window of a police station, the original production was seen by over half a million people. This incisive satire on police corruption, media manipulation and political shenanigans is here translated by Simon Nye. This version of *Accidental Death of an Anarchist* premiered at the Donmar Warehouse, London in February 2003. "A marvellous concept: a zany political farce..." Michael Billington, *Guardian* "Fo's play absorbs social indignation into mainstream Italian comedy" The Times

Dante's letter to Lord Can Grande della Scala, concerning the *Divine Comedy* in general, the *Paradiso* in particular, and the method to be used for interpretation.

**NAMED NPR "BEST BOOKS OF 2017" ** From the winner of the 2016 Orwell Prize and the European Press Prize for Commentator of the Year, a provocative analysis of how a new era of global instability has begun, as the flow of wealth and power turns from West to East. Easternization is the defining trend of our age — the growing wealth of Asian nations is transforming the international balance of power. This shift to the East is shaping the lives of people all over the world, the fate of nations, and the great questions of war and peace. A troubled but rising China is now challenging America's supremacy, and the ambitions of other Asian powers — including Japan, North Korea, India, and Pakistan — have the potential to shake the whole world. Meanwhile the West is struggling with economic malaise and political populism, the Arab world is in turmoil, and Russia longs to reclaim its status as a great power. As it becomes clear that the West's historic power and influence is receding, Gideon Rachman offers a road map to the turbulent process that will define the international politics of the twenty-first century.

Edition commentée de ce poème latin de 549 vers sur l'art de la peinture qui connut un succès considérable aux XVIIe et XVIIIe siècles.

After reviewing, from a grammaticalization perspective, the main stages in the evolution of Italian object clitic pronouns, the book discusses the distinctive morphosyntactic, semantic, and pragmatic features of Italian clitics. In particular, the book offers an original study of the most common examples of so-called *verbi procomplementari*, verbs which are characterized by the incorporation of clitics that no longer function as pronouns, and which are widely used in present-day Italian. Their emergence involves both grammaticalization of the clitic pronoun into an obligatory element, and lexicalization of the verb+clitic sequence. This study is essentially descriptive and maximally data-driven. The discussion of grammaticalization and lexicalization is reduced to the essentials and aims primarily at defining how these terms, which have received different and at times divergent interpretations, are employed in the book. The book is accessible to a wide and varied readership, which includes Italian and Romance linguists of functional and formal orientation, Italian language scholars, grammaticalization scholars interested in new case studies, as well as students of language change and variation.

Endodontic Radiology, 2nd edition, is a unique reference that examines all aspects of radiographic imaging related to endodontics. Dr. Bettina Basrani and a team of prestigious international contributors build upon traditional radiographic techniques and include the latest information available on digital radiographs and cone beam computed tomography. More than an overview of equipment, the book delves into radiographic interpretation, differential diagnosis, technical difficulties and special circumstances when taking radiographs during the endodontic treatment, and how to choose the correct radiographic technique to obtain the desired images. Chapters explain general radiographic techniques; intraoral techniques; standard radiographs and interpretation; digital radiographs and their manipulation, storage, and interpretation; and CBCT principles, techniques, and clinical considerations.

Be a Carrier of God's Glory Jesus said, "And the glory which You gave Me I have given them, that they may be one just as We are one" (John 17:22 NKJV). God designed you to dwell in His presence, understand His heart, and experience His divine power—transforming your life and enabling you to do miracles and wonders that reveal His majesty on earth. Through the insights Guillermo Maldonado presents in *The Glory of God*, you can personally... Develop a passion and thirst for God Be ignited by God's fire to do the "impossible" Become a dynamic witness and see lives transformed Confirm the gospel with supernatural signs Enter into spiritual rest—and watch God work Receive the miracle you need! The glory of God is a reality to be experienced. Enter into His manifest presence today and be changed forever.

Investigative reporter Emma Boylan has split from her husband and moved in with Detective Inspector Jim Connolly. All is bliss until Connolly's ex-wife, Iseult, accuses him of aggravated rape. Iseult, with the help of her friends, fabricates "compelling evidence" against Connolly. Her scheme unravels, however, when her plan is hijacked by someone outside her circle and used for a far more sinister purpose. And when Iseult's corpse is found, her friends go to the authorities with their concocted evidence against Connolly. Only Emma Boylan appears to be on his side, but her motives are questioned when it becomes known that she and the detective are lovers. When two more victims meet unnatural deaths, and Emma is attacked, she must protect herself while attempting to solve the mystery of who has framed Connolly and killed his ex-wife.

Offers a comprehensive account of all conventional indications for laser-assisted dentistry, including cavity preparation, endodontics, and periodontal therapy, as well as recent advancements such as laser-assisted bleaching, soft laser applications, and the treatment of hypersensitive cervical areas. For each indication, detailed instructions on the use of the laser are provided in both text and illustrations to allow even novices to make successful, responsible, and immediate use of this innovative technology. In addition, each chapter presents its topic in the context of the underlying scientific concepts and a thorough and up-to-date review of the extant literature. The book also features in-depth discussion of all available wavelengths and their specific applications to guide readers in the purchase of a new laser system as well as extensive case reports to demonstrate achievable therapeutic outcomes and allow readers to compare their results with those of other users. Oral Laser Application is an invaluable guide for all clinicians currently using or wishing to integrate laser-assisted dentistry in their practice.

"In the 1930s a girl in Mexico found two skulls and brought them to the U.S. One was a normal human, the other was something else. Since 1999, Lloyd Pye has coordinated the extensive scientific testing of both skulls. The Starchild Skull is a charmingly wry, addictively readable book chronicling Pye's odyssey with the skulls."--From the publisher.

Russia, 1910. Leo Tolstoy lies dying in Astapovo, a remote railway station. Members of the press from around the world have descended upon this sleepy hamlet to record his passing for a public suddenly ravenous for celebrity news. They have been joined by a film company whose cinematographer, Nikolai Gribshin, is capturing the extraordinary scene and learning how to wield his camera as a political tool. At this historic moment he comes across two men -- the scientist, Professor Vorobev, and the revolutionist, Joseph Stalin -- who have radical, mysterious plans for the future. Soon they will accompany him on a long, cold march through an era of brutality and absurdity. The Commissariat of Enlightenment is a mesmerizing novel of ideas that brilliantly links the tragedy and comedy of the Russian Revolution with the global empire of images that occupies our imaginations today.

Walter de Gruyter
Exploring autobiographical texts written by European urban craftsmen from the 15th to the 18th centuries, this book studies memoirs, diaries, family chronicles, travel narratives, and other forms of personal writings from Spain, France, Italy, Germany, and England. In the process, it reveals the significance of written self-expression in early modern popular culture.

The retrieval in 1990 of what is probably the sole surviving copy of Uriel da Costa's book, outlawed and burnt in 1624, is an almost miraculous boon for humanity. Da Costa's Exame, supplemented by da Silva's Tratado, merits a prominent place in the history of thought, Judaism and Portuguese Literature.
