Facebook, Twitter, Snapchat, YouTube, LinkedIn, and dozens of other services have been described as the vanguard of creative destruction across the media industries-disruptors of established business, heroes of a new economic narrative that supposes that the attention of individual users can be measured, managed, manipulated, backing methods that securitized, patented, and litigated attention in ways impossible before. Selling Social Media catalogues the key terms and discourses of the rise of social media firms with a particular emphasis on monetization, securitization, disruption, and litigation. Tensions between ideas and terms are critical, as the ways that different aspects of social media business are described change depending on the audience, scale, and maturity of the firm. These divergent discourses are bound together into a single story of social media, an industry that challenges the theories and descriptions of media that have come before. Through a reading of social media business this book offers a chance to revisit media theory in the context of a new social media companies and products that depend on a different understanding of media audiences, media industries, and public agency.

Real estate day trading is using the Internet to buy and sell houses without leaving home. In many cases, the investor closes on a house and resells it the same day. Readers will learn the author's system for how to buy and sell 5-10 houses a month in today's market, using the Internet, phone, fax, and email to analyze, research, and find the properties, buyers, and others needed for the transaction. Author Larry Goin has personally done deals in nine different states and has students in the US, Canada, Australia, New Zealand, Japan, China, Israel, the Philippines, and Denmark. Day trading can be used for wholesaling properties to other investors, retailing, lease options, short sales, foreclosure investing, etc. The basic steps are: Search online for potential properties to make offers on, using specific techniques for finding the right ones. Once an offer is accepted, usually within 1-2 weeks, put it on paper using clauses included in the book, and get the property inspected by a rehab contractor to get a fee estimate of how much the repairs will cost. This is done by finding reputable contractors online and through referrals from realtors and through autoresponders. Order an appraisal. Sell it fast! Using the buyers list you have built on the internet through email marketing groups, social networking sites, blogs, free classified sites, bank-owned property sites, and more, send an email with the details of the property and instructions on how they can get the property under contract. Usually within two hours several potential buyers will reply. Set up a closing to buy it and to sell it on the same day; closings are about 30 minutes apart. By it at 10:00 and sell it at 10:30, for example. There are many ways to fund and close on the property. The book will contain step-by-step, easy processes for assignments, options, flex options, simultaneous closings, using hard money, private money, cash partners, and credit partners, none of which will require an investor's own cash or credit. With praise from New York Times Bestselling Author Dr. Albert Lowery, Robert Shemin, Frank McKinney and foreword by Michael E. Gerber. Larry Goin's (Lake Wylie, SC; www.larrygoins.com) is one of the real estate industry's most popular speakers. Today, our global village is filled with strife, caused primarily by extremists of every kind, all unwilling to compromise. But there is a better way—a middle way—where we might discover common ground for peace, both personally and universally. Lou Marinoff, professor of philosophy and author of Plato, not Prozac, reveals the ABCs of finding that spiritually rich path: Aristotle, Buddha, and Confucius. Each of these wise men knew that extremism destroys happiness, health and harmony, and shared the supremely important notion that the main purpose of our existence is to lead a good life, here and now. In three sections, Marinoff explains the contemporary world and shows how the "Middle Way" provides solutions to our most pressing problems. Part One looks at civilizational dynamics that drive both cooperation and conflict across borders, and introduces each of the ABCs. The second segment focuses on some notorious extremes—including political polarization, and simmering religious, tribal, gender, cultural, and economic divides—and how the ABCs can reconcile them. And the third, final section enlightens us on how we all can apply the ABCs to the betterment of our own lives and humanity as a whole. A short list of recommended readings accompanies each chapter, along with illustrations, maps, and eye-opening charts.

Throughout the first half of the nineteenth century, America was captivated by a muddled notion of "etymology." New England Transcendentalism was only one outcropping of a nationwide movement in which schoolmasters across small-town America taught students the roots of words in ways that dramatized religious issues and sparked wordplay. Shaped by this ferment, our major romantic authors shared the sensibility that Friedrich Schlegel linked to punning and christened "romantic irony." Notable punsters or etymologists all, they gleefully set up as sages, creating jocular masterpieces from their zest for oracular wordplay. Their search for a primal language lurking beneath all natural languages provided them with something like a secret language that encodes their meanings. To fathom their essentially comic masterpieces we must decipher it. Interpreting Thoreau as an ironic moralist, satirist, and social critic rather than a nature-loving mystic, Transcendental Wordplay suggests that the major American Romantics shared a surprising conservatism. In this award-winning study, Professor West rescues the pun from critical contempt and allows readers to enjoy it as a seriously funny form of American humor.
