

## Essential Readings

This reader covers current theory, research and practice in Early Intervention with young children, bringing together the best recent papers by prominent researchers in the field. A collection of the best recent papers on Early Intervention. Brings together current theory, research and practice in EI with young children. Covers a range of topics in childhood development and intervention. Each paper is introduced and contextualised by the editor.

Sociolinguistics: The Essential Readings is a collection of classic articles that have helped define the field of sociolinguistics and provide the foundation for future research, paired with more recent articles which indicate the direction the field has taken. Offers a collection of classic articles that helped to define the field of sociolinguistics paired with more contemporary articles. Contextualizes the history of the subject matter and helps students understand the progression of intellectual development in the field. Includes an editorial introduction written by two prominent researchers in the field, as well as recommendations for further readings.

This reader is designed to make accessible in one volume, to lay person and academic, student and teacher alike, key readings to stimulate debate about and within critical realism.

An ideal introduction for the casual reader and a beneficial reference for the student, The Philosopher's Handbook features the writings of some of the world's most influential philosophers. Based on the premise that all human beings are curious about their existence, Rosen's collection brings together primary excerpts from the works of prominent thinkers such as Plato, Nietzsche, Descartes, Machiavelli, and Kant. Experts in each field have carefully selected the sources and provided brief introductions to help readers gain insight into the readings. Newly revised in order to emphasize its broad appeal, The Philosopher's Handbook is a solid introduction to Western philosophy for all inquiring minds.

This collection of readings with extensive editorial commentary brings together key texts of the most influential philosophers of the medieval era to provide a comprehensive introduction for students of philosophy. Features the writings of Augustine, Thomas Aquinas, Boethius, John Duns Scotus and other leading medieval thinkers Features several new translations of key thinkers of the medieval era, including John Buridan and Averroes Readings are accompanied by expert commentary from the editors, who are leading scholars in the field What if anything justifies us in believing the testimony of others? How should we react to disagreement between ourselves and our peers, and to disagreement among the experts when we ourselves are novices? Can beliefs be held by groups of people in addition to the people composing those groups? And if so, how should groups go about forming their beliefs? How should we design social systems, such as legal juries and scientific research-sharing schemes, to promote knowledge among the people who engage in them? When different groups of people judge different beliefs to be justified, how can we tell which groups are correct? These questions are at the heart of the vital discipline of social epistemology. The classic articles in this volume address these questions in ways that are both cutting-edge and easy to understand. This volume will be of great interest to scholars and students in epistemology.

Ethics: Essential Readings in Moral Theory is an outstanding anthology of the most important topics, theories and debates in ethics, compiled by one of the leading experts in the field. It includes sixty-six extracts covering the central domains of ethics: why be moral?

the meaning of moral language morality and objectivity consequentialism deontology virtue and character value and well-being moral psychology applications: including abortion, famine relief and consent. Included are both classical extracts from Plato, Aristotle, Hume, Kant and Mill, as well as contemporary classics from philosophers such as Thomas Nagel, Thomas Scanlon, Martha Nussbaum, Derek Parfit, and Peter Singer. A key feature of the anthology is that it covers the perennial topics in ethics as well as very recent ones, such as moral psychology, responsibility and experimental philosophy. Each section is introduced and placed in context by the editor, making this an ideal anthology for anyone studying ethics or ethical theory.

Featuring several all-new chapters, revisions, and updates, the Second Edition of A Cultural Approach to Interpersonal Communication presents an interdisciplinary collection of key readings that explore how interpersonal communication is socially and culturally mediated.

Includes key readings from the fields of cultural and linguistic anthropology, sociolinguistics, and communication studies Features new chapters that focus on digital media Offers new introductory chapters and an expanded toolkit of concepts that students may draw on to

link culture, communication, and community Expands the Ethnographer's Toolkit to include an introduction to basic concepts followed by a range of ethnographic case studies

Santaraksita's "Neither-One-Nor-Many" Argument from The Ornament of the Middle Way (Madhyamakalamkara): A Classical Buddhist Argument on the Ontological Status of Ph.

Chronological anthology of 38 essays that demonstrate the long and complex intellectual history of racism as an idea and show how powerful groups have utilized racism to advance social, economic, or cultural interests.

An outstanding voice in the field, the jazz critic for The Village Voice leads readers through the first century of the music in a voluminous, expert account of the great jazz artists past and present and their distinctive contributions. UP.

This is a compilation of the best papers in the history of Magnesium Technology, a definitive annual reference in the field of magnesium production and related light metals technologies. The volume contains a strong topical mix of application and fundamental research articles on magnesium technology. Section titles: 1.Magnesium Technology History and Overview 2.Electrolytic and Thermal Primary Production 3.Melting, Refining, Recycling, and Life-Cycle Analysis 4.Casting and Solidification 5.Alloy and Microstructural Design 6.Wrought Processing 7.Modeling and Simulation 8.Joining 9.Corrosion, Surface Treatment, and Coating

Essential Readings from the Melanie Klein Archives: Original Papers and Critical Reflections brings together a selection of previously unpublished material by Melanie Klein, one of the key architects of child psychoanalysis, and sets it in the context of the contemporary understanding of her work, with contributions by a range of leading Klein scholars. The book contains lectures, letters, notes and an autobiography by Klein, as well as key pieces of analysis on Klein's work from major Kleinian analysts, with contributions from Claudia Frank, R.D. Hinshelwood, Jane Milton and Maria Rhode based on wide-ranging research into Klein's archive. Bringing the work of Claudia Frank to an English audience for the first time, there is also a new chapter by Maria Rhode featuring further case material on Klein's famous young patient 'Dick', the subject of Klein's 1930 paper on symbolism, which is discussed in relation to current ideas about the autistic spectrum. This material fleshes out our understanding of Klein's thinking, shines new light on the major features of her work, and the influences on the analyst herself. Melanie Klein was a pioneering and sometimes controversial figure within psychoanalysis, whose new approach to child analysis and new understanding of our inner world were revolutionary. Her large archive (now available online) contains papers and drafts of papers, notes for lectures and seminars and a vast amount of case material, all of which is of scientific interest. Essential Readings from the Melanie Klein Archives will be of great interest to Klein scholars, as well as to researchers and readers in the wider history and development of psychoanalysis.

ONE OF A FOUR-BOOK COLLECTION SPOTLIGHTING CLASSIC ARTICLES Landmark research findings and reviews in aluminum reduction technology Highlighting some of the most important findings and insights reported over the past five decades, this volume features many of the best original research papers and reviews on aluminum reduction technology published from 1963 to 2011. Papers have been organized into seven themes: 1. Fundamentals 2. Modeling 3. Design 4. Operations 5. Control 6. Environmental 7. Alternative processes The first six themes deal with conventional Hall-Héroult electrolytic reduction technology, whereas the last theme features papers dedicated to nonconventional processes. Each section begins with a brief introduction and ends with a list of recommended articles for further reading, enabling researchers to explore each subject in greater depth. The papers for this volume were selected from among some 1,500 Light Metals articles. Selection was based on a rigorous review process. Among the papers, readers will find breakthroughs in science as well as papers that have had a major impact on technology. In addition, there are expert reviews summarizing our understanding of key topics at the time of publication. From basic research to advanced applications, the articles published in this volume collectively represent a complete overview of aluminum reduction technology. It will enable students, scientists, and engineers to trace the history of aluminum reduction technology and bring themselves up to date with the current state of the technology.

Studies of racism often focus on its devastating effects on the victims of prejudice. But no discussion of race is complete without exploring the other side--the ways in which some people or groups actually benefit, deliberately or inadvertently, from racial bias. White Privilege, Second Edition, the revision to the ground-breaking anthology from Paula Rothenberg, continues her efforts from the first edition. Two new essays contribute to the discussion of the nature and history of white power. The concluding section again challenges readers to explore ideas for using the power and the concept of white privilege to help combat racism in their own lives. Brief, inexpensive, and easily integrated with other texts, this interdisciplinary collection of commonsense, non-rhetorical readings lets educators incorporate discussions of whiteness and white privilege into a variety of disciplines, including sociology, English composition, psychology, social work, women's studies, political science, and American studies.

An affordable, balanced collection--refreshed and reimagined

This revised and expanded Third Edition of the internationally acclaimed Criminological Perspectives is the most comprehensive reader available in the field. Wide-ranging and global in scope and coverage, Criminological Perspectives will enable you to critically engage with the various concepts and theoretical positions that you'll encounter throughout your studies. In had a seminal influence on the development of criminology, new articles have been included to cover topics of contemporary criminological significance, including: - surveillance - digitized crime - terrorism and political violence - environmental crime - human trafficking - techno-social networks - narco-crime - global inequalities The 56 articles are organised thematically that place them in context and to illustrate the approaches taken by different schools of criminological thought. Criminological Perspectives will prove an indispensable resource, whether you're studying criminology, criminal justice studies, socio-legal studies, penology, security studies, surveillance studies, or sociology.

This compilation of carefully selected readings is meant to allow for deeper analysis of the issues covered in Essentials of Health Policy and Law, yet also serves as an excellent complement to any text on health policy.

African American Communication and Identities brings together key essays concerning communicative aspects of African American identities. This book explains the disciplinary dimensions of African American communication literature: communication theory & identity; language & rhetoric; relational contexts; gendered contexts; organizational & instructional contexts; and the first anthology of well-known essays concerning the study of both African American communication and African American identities, showing how each mutually informs the other.

This is a collection of 50 of the most influential articles in the century-old field of sport and exercise psychology. The editors have abridged articles to ensure that the essential themes are covered but without extraneous explanation of concepts that may be covered by multiple articles.

This book examines key papers for students of health psychology. Each chapter reviews classic and contemporary papers which have been chosen either for their theoretical importance or as good empirical indicators of a model

This collection gathers a set of seminal papers from the emerging area of ethics and climate change. Topics covered include human rights, international justice, intergenerational ethics, individual responsibility, climate economics, and the ethics of geoengineering. Climate Ethics is intended to serve as a source book for general reference, and for

university courses that include a focus on the human dimensions of climate change. It should be of broad interest to all those concerned with global justice, environmental science and policy, and the future of humanity.

Theory on mothers, mothering and motherhood has emerged as a distinct body of knowledge within Motherhood Studies and Feminist Theory more generally. This collection, The Second Edition of Maternal Theory: Essential Readings introduces readers to this rich and diverse tradition of maternal theory. Composed of 60 chapters the 2nd edition includes two sections: the first with the classic texts by Adrienne Rich, Nancy Chodorow, Sara Ruddick, Alice Walker, Barbara Katz Rothman, bell hooks, Sharon Hays, Patricia Hill-Collins, Audre Lorde, Daphne de Marneffe, Judith Warner, Patrice diQinizio, Susan Maushart, and many more. The second section includes thirty new chapters on vital and new topics including Trans Parenting, Non-Binary Parenting, Queer Mothering, Matricentric Feminism, Normative Motherhood, Maternal Subjectivity, Maternal Narratology, Maternal Ambivalence, Maternal Regret, Monstrous Mothers, The Migrant Maternal, Reproductive Justice, Feminist Mothering, Feminist Fathering, Indigenous Mothering, The Digital Maternal, The Opt-Out Revolution, Black Motherhoods, Motherlines, The Motherhood Memoir, Pandemic Mothering, and many more. Maternal Theory is essential reading for anyone interested in motherhood as experience, ideology, and identity.

This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present. It offers an in-depth range of readings on important applied issues in technology as well. Useful in addressing questions on philosophy, sociology, and theory of technology Includes wide-ranging coverage on metaphysics, ethics, and politics, as well as issues relating to gender, biotechnology, everyday artifacts, and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought-provoking book for beginning and advanced undergraduates; yet also a helpful resource for graduate students and academics

Sports are more than just "games". They can unite countries, start wars, and revolutionize views on race, class, and gender. Through works from philosophy, sociology, medicine, and law, this collection explores intersections of sports and ethics, and identifies the immense role of sports in shaping and reflecting social values

This book surveys the state of problem-based learning and assesses the impact of this innovative educational methodology on teaching and research effectiveness across a range of disciplines and in a variety of organizational contexts.

The twelve readings in this volume represent some of the best recent scholarship on the Crusades.

From Rodney King and "driving while black" to claims of targeting of undocumented Latino immigrants, relationships surrounding race, ethnicity, and the police have faced great challenge. Race, Ethnicity, and Policing includes both classic pieces and original essays that provide the reader with a comprehensive, even-handed sense of the theoretical underpinnings, methodological challenges, and existing research necessary to understand the problems associated with racial and ethnic profiling and police bias. This path-breaking volume affords a holistic approach to the topic, guiding readers through the complexity of these issues, making clear the ecological and political contexts that surround them, and laying the groundwork for future discussions. The seminal and forward-thinking twenty-two essays clearly illustrate that equitable treatment of citizens across racial and ethnic groups by police is one of the most critical components of a successful democracy, and that it is only when agents of social control are viewed as efficient, effective, and legitimate that citizens will comply with the laws that govern their society. The book includes an introduction by Robin S. Engel and contributions from leading scholars including Jeffrey A. Fagan, James J. Fyfe, Bernard E. Harcourt, Delores Jones-Brown, Ramiro Martínez, Jr., Karen F. Parker, Alex R. Piquero, Tom R. Tyler, Jerome H. Skolnick, Ronald Weitzer, and many others.

The problem of free will is one of the great perennial issues of philosophy and has been discussed and debated over many centuries. The issues that arise in this sphere cover both metaphysics and morals and concern matters of central importance not only for philosophy but also for law, theology, psychology and the social sciences. What is at stake here is nothing less than our self-image as responsible moral agents who are in control of our own destiny and fate. The investigations and findings of modern science are judged by many to put skeptical pressure on this self-image and may challenge its credibility. During the past few decades the free will controversy has developed and evolved in exciting and significant ways. All the major parties involved in this debate have had to revise and amend their core positions with a view to responding to the sophisticated and searching arguments put forward by their critics and opponents. The papers collected in this volume represent the most essential and indispensable contributions to the contemporary debate. The specific topics covered include: moral luck, skepticism and naturalism, the consequence argument, alternate possibilities, libertarian metaphysics, compatibilism and reason-responsive theories, illusionism and revisionism, optimism and pessimism, and the phenomenology of agency, as well as contributions relating to neuroscience and experimental philosophy. The collection is arranged in a way that presents the topics covered in a structured and organized manner. The general aim is to provide an effective guide for students and readers who are new to the field, as well as a useful collection for those who are already familiar with the topics and contributions. The contributors include many of the leading and most distinguished figures in the field, along with a number of younger scholars who have already had an impact and produced significant work.
