Purity and Danger is acknowledged as a modern masterpiece of anthropology. It is widely cited in non-anthropological works and gave rise to a body of application, rebuttal and development within anthropology. In 1995 the book was included among the Times Literary Supplement's hundred most influential non-fiction works since WWII.

Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and

in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the

*In *Flirting with Danger*, Lynn M. Phillips explores how young women make sense of, resist, and negotiate conflicting cultural messages about sexual agency, responsibility, aggression, and desire. How do women develop their ideas about sex, love, and domination? Why do they express feminist views condemning male violence in the abstract, but often adamantly refuse to name their own violent and exploitive encounters as abuse, rape, or victimization? Based on in-depth individual and collective interviews with a racially and culturally diverse sample of college-aged*

Buster Casey was every small kid born in a small town, searching for real thrills in a world of video games and action/adventure movies. The high school rebel who always wins – and a childhood murderer? – Rant Casey escapes from his hometown of Middleton into the big city and becomes the leader of an urban demolition derby called Party Crashing, where, on designated nights, the participants recognize each other by dressing their cars with tin-can tails, "Just Married" toothpaste graffiti, and other refuse, then look for special markings in

View "Public Restrooms": A Photo Gallery in The Atlantic Monthly. So much happens in the public toilet that we never talk about. Finding the right door, waiting in line, and using the facilities are often undertaken with trepidation. Don't touch anything. Try not to smell. Avoid eye contact. And for men, don't look down or let your eyes stray. Even washing one's hands are tied to anxieties of disgust and humiliation. And yet other things also happen in these spaces: babies are changed,

Download File PDF Flirting With Danger

conversations are had, make-up is applied, and notes are scrawled for posterity. Beyond these private issues, there are also real public concerns: problems of public access, ecological waste, and—in many parts of the world--sanitation crises. At public events, why are women constantly waiting in long lines but not men? Where do the homeless go when cities decide to close public sites? Should bathrooms become standardized to accommodate the disabled? Is it possible to create a unisex bathroom for transgendered people? In *Toilet*, noted sociologist Harvey Molotch and Laura Norén bring together twelve essays by urbanists, historians and cultural analysts (among others) to shed light on the public restroom. These noted scholars offer an assessment of our historical and contemporary practices, showing us the intricate mechanisms through which even the

Download File PDF Flirting With Danger

physical design of restrooms—the configurations of stalls, the number of urinals, the placement of sinks, and the continuing segregation of women's and men's bathrooms—reflect and sustain our cultural attitudes towards gender, class, and disability. Based on a broad range of conceptual, political, and down-to-earth viewpoints, the original essays in this volume show how the bathroom—as a practical matter--reveals competing visions of pollution, danger and distinction. Although what happens in the toilet usually stays in the toilet, this brilliant, revelatory, and often funny book aims to bring it all out into the open, proving that profound and meaningful history can be made even in the can.
