Advanced degrees are necessary for careers that once required only a college education. Yet little has been written about who gets into grad school and why. Julie Posselt pulls back the curtain on this secret process, revealing how faculty evaluate applicants in top-ranked doctoral programs in the humanities, social sciences, and natural sciences.

A comprehensive guide to graduate school helps prospective students decide whether and where to go, what to study, how to apply, how to pay for it, and how to excel in it, and features advice from admissions officers and experienced students. Original.

"This book synthesizes three decades of academic advising into a user-friendly guide, detailing the path from high school, to selecting the right colleges, to the application process, to thriving as an undergraduate. Writing tips demystify the college admission essay, offering step-by-step guidance from prewriting to revision"--  
The statement of purpose is the most important part of an application to graduate school in the humanities, but applicants often struggle to write these documents. The SOP, as it is often called, is particularly difficult for students coming from outside of

the United States because they do not understand the idiosyncratic conventions of the US academy. This guide provides explanations and concrete examples of the five answers that all statements of purpose must provide: trajectory, focus, accomplishments, aims, and fit. Written by a scholar who has coached applicants to successful admission to programs at the University of Chicago, Northwestern University, and the University of Southern California, among others, this guide will offer a window onto what humanities graduate programs in the United States are looking for, and what they need to know in order to accept your application.

This book provides college students with the information they need to apply successfully to graduate school. Misconceptions about graduate school are revealed and dispelled, including the most common myth - that one must have excellent grades to get in, and that excellent grades are all one needs. Other factors that may play a bigger role than GPA are discussed, and the reader discovers how the process of selecting applicants actually works in most graduate programs.

Demystifying the process of completing a college application Written by two former admissions officers at top universities and current admissions coaches, this book is a must-have for preparing a winning college application. The authors reveal the mystery

behind what college admissions officers are looking for and show applicants how to leverage their credentials, stand out in the over-crowded applicants' pool, and make a genuine, memorable impression. This is the book that will help the college-bound get off the "like many others" pile and onto the acceptance list. Includes instructions and examples for every component of the college application, from writing the essay to answering questions like "Why do you want to go to College X?" Shows how to avoid underestimating the importance of critical features on any application Includes the latest information on the Common Application 4.0 and corrects outdated, holdover advice still stressed in many other books This book is filled with step-by-step advice that students and parents can use immediately and will refer to again and again.

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department

Pieces of the Frame is a gathering of memorable writings by one of the greatest journalists and storytellers of our time. They take the reader from the backwoods roads of Georgia, to the high altitude of Ruidoso Downs in New Mexico; from the social decay of Atlantic City, to Scotland, where a pilgrimage for art's sake leads to a surprising encounter with history on a hilltop with a view of a fifth of the entire country. McPhee's

writing is more than informative; these are stories, artful and full of character, that make compelling reading. They play with and against one another, so that Pieces of the Frame is distinguished as much by its unity as by its variety. Subjects familiar to McPhee's readers-sports, Scotland, conservation-are treated here with intimacy and a sense of the writer at work.

Special section with writing tips and the most common grammatical mistakes that students make on their essays. Writing, for most of us, is bound up with anxiety. It’s even worse when it feels like your whole future—or at least where you’ll spend the next four years in college—is on the line. It’s easy to understand why so many high school seniors put off working on their applications until the last minute or end up with a generic and clichéd essay. The good news? You already have the “secret sauce” for crafting a compelling personal essay: your own experiences and your unique voice. The best essays rarely catalog how students have succeeded or achieved. Good

How colleges and universities can live up to their ideals of

diversity, and why inclusivity and excellence go hand in hand. Most colleges and universities embrace the ideals of diversity and inclusion, but many fall short, especially in the hiring, retention, and advancement of faculty who would more fully represent our diverse world—in particular women and people of color. In this book, Abigail Stewart and Virginia Valian argue that diversity and excellence go hand in hand and provide guidance for achieving both. Stewart and Valian, themselves senior academics, support their argument with comprehensive data from a range of disciplines. They show why merit is often overlooked; they offer statistics and examples of individual experiences of exclusion, such as being left out of crucial meetings; and they outline institutional practices that keep exclusion invisible, including reliance on proxies for excellence, such as prestige, that disadvantage outstanding candidates who are not members of the white male majority. Perhaps most important, Stewart and Valian provide practical advice for overcoming obstacles to inclusion. This advice is based on their experiences at their own universities, their consultations with faculty and administrators at many other institutions, and data on institutional change. Stewart and Valian offer recommendations for changing structures and practices so that people become successful in ways that benefit everyone. They describe better ways of searching for job candidates; evaluating candidates for hiring, tenure, and promotion; helping faculty succeed; and broadening rewards and recognition.
