

Second Chance With The Surgeon

I have read through this book and am really inspired by all the works that Dr. Mueller has done for the Karen hill tribe. The works and experiences that he had with the Karen people in the Karen State are tremendously amazing. This book will bring great understanding for people and foreigners who want to help out, especially those who are sympathetic to the causes and needy people who still lack many things. I enjoyed reading this book. It was a blessing to us Karens that we had someone like Dr. Mueller who helped to bring humanitarian assistance to the remote areas in order to spread the gospel and make things better for others. I deeply thank him for all the works that he has done for our Karen people and other ethnic groups. -Major General Ner Dah Bo Mya, Chief of Staff, Karen National Defense Organization Dr. Larry Mueller is a pioneering physician who has the longest and most in-depth experience of any medical professional who served in the conflict areas of Burma. He donated significant professional time over twenty-five years serving in the Thai-Burmese border areas. Whether directly treating IDPs (internally displaced persons), or refugees in the border zones with his surgical skill, or training medics, he has been the most revered doctor in these areas and is considered an angel. Dr. Mueller is a brilliant surgeon who is flexible, inventive, and, above all, able to operate successfully in remote locations with very little support. Through his own surgeries and the training that he has imparted to our medics, Dr. Mueller has saved hundreds of lives and had a direct impact on healing and improving the lives of thousands more. -David Eubank, Founder and Director, Free Burma Rangers (www.freeburmarangers.org) UNEXPECTED FAMILY... Hannah Buck didn't plan on starting a family that night. Her hands are already full managing the ranch and helping her troubled half brother. But Hannah sees the good in Alonso and knows he will be an incredible dad to their baby—if only he could see it, too. Alonso has spent his life saving others. The greatest adventure in our lives is to learn the art of being happy. Happiness, like worry, is a habit, just as tying a shoelace or brushing our teeth becomes a habit. And, as you'll learn in this book, it only takes five minute a day to install happiness as a lifelong habit. Once the happiness habit is developed then it becomes a permanent part of your personality—requiring little or no effort on your part. You'll learn that tensions are at a minimum when we are happy. We cannot eliminate tensions altogether, yet wherever possible we must stand up to these tensions and stresses to develop our mental and spiritual muscles, just as in a game an athlete shows his abilities best under stress. In this book, you'll learn that we have a "built-in" success mechanism, also a "built-in" failure mechanism, and it is up to us to utilize the success mechanism in order to maximize happiness. And you'll learn that to be happy we must learn that we have another image besides the external one we see in the mirror. We have an inner self image that is the result of what we are and what we think we are...and this image we ourselves create depending on what aspects of the success or failure mechanisms we use. This in turn gives clothing to our personality. Getting the happiness habit means that we can use our imagination properly. Getting the happiness habit means that we become our own plastic surgeon and without the use of a magic scalpel perform magic on our self image, constructing a self image we can live with by removing the scar on it through understanding—an inner scar we put there with our own mental and spiritual bands, because we didn't understand. In Five Minutes to Happiness, you'll spend five minutes each day to reinforce these key ideas, and to pave the way to a joyous life adventure.

A Christmas Kiss with Her Ex-Army Doc Can a Christmas kiss lead to for ever? Nurse Hollee is stunned when ex-army doc, Clancy, begins working at her hospital. Years ago, they shared a passionate kiss – but then Clancy left. Now, as desire reignites, it 's clear they never forgot each other... There are times that we make plans and it seems like everything goes wrong. During a vacation it rains all the time, A family get together and most the family does not show up, Or even the simplest task brings problems and what was timely and easy turns out to be the project from hell.I have learned that no matter what I plan, God's plan always supersedes them. I can't count how many times that I have had to change my plans for His. In this book you will see that God's plans took over when something went wrong with the surgery that I had.No matter what the Surgeon planned or how many times he had done this operation, even the best plans go wrong.There are times in our lives that things happen and we don't understand why it happened? There could be a sickness, or loss of a loved one, or even a financial setback. The Word of God states that 'man can make his plans but it is God who has the final say so.' I had a lot of things that I had planned to do this summer, I wanted to start teaching in the new church that my wife and I had just joined, and there were some churches that we wanted to go to and visit, I also was in the process of trying to help those with depression and anxiety by doing group speaking, because I have battled that before, and I wanted to start on a new book. I had some tests done and it revealed that I was in need of Open Heart Surgery. Through this ordeal I learned that we can make plans and hope they go the right way. The surgery to fix my valve and repair my aneurism was to be a 3 hour surgery but it took 4 hours. This began the journey was one of the hardest times of my life. The Doctor said that there should not be any problems, but God has the final say so. There is a reason for everything that happens, even though at the time that things are happening, we can't see it. This is the journey of God's plans for me and those around me. As I had died in my room when I had the heart attack and God brought me back. And another time in rehabilitation I was given the wrong medicine that caused me to almost die again, this time from of respiratory failure. I was in a battle for my life. My wife believed that satan was trying to kill me and keep me from ministering to God's people. But God had other plans. Even though this ordeal of dying and God breathing life back into me, and almost dying again, I learned more about God's Grace, Mercy and Strength than I have in the 35 years of ministry. I know that God has a purpose and a plan for everything that happens; I just could not see what His plan was for my wife and me enduring everything that we went through during this testing. The degree of pain that we both went through was horrendous. However, I have learned that any plans I have is of no consequence to the plans of God. God also brought out a part of my wife that had been lying dormant through the years as she became a Prayer Warrior for my life. As you read this book you will come to understand that no matter what we plan it is God's plan and purpose that prevails, and it is then we realize that He is a God of a second chance.

This book examines the iconic presence of second chances in everyday life. David Newman explores its various iterations in popular culture, commercial marketplaces, religion, intimate relationships, education, criminal justice, and human bodies. He analyzes how this concept—as a cultural aspiration, driver of policy, and lived personal experience—has become part and parcel of our individual sense of self and our collective national identity. While the rhetoric of redemption is familiar and ubiquitous, Newman uncovers the costs and constraints of second chances, paying particular attention to the factors that affect judgments of deservedness. Informed by an array of data sources including personal interviews, mission statements of nonprofit recovery agencies, images in popular culture, stories from the news, plot summaries of novels, and scriptural texts, Newman frames the second chance experience as the quintessential cultural paradox: a concept that simultaneously represents the pinnacle of our shared hopes for renewal and our deepest suspicions about the intransigence of human nature.
