Over the last forty years, surfing has emerged from its Pacific islands origins to become a global industry. Since its beginnings more than a thousand years ago, surfing's icon has been the surfboard—its essential instrument, the point of physical connection between human and nature, body and wave. To a surfer, a board is more than a piece of equipment; it is a symbol, a physical emblem of cultural, social, and emotional meanings. Based on research in three important surfing locations—Hawai'i, southern California, and southeastern Australia—this is the first book to trace the surfboard from regional craft tradition to its key role in the billion-dollar surfing business. The surfboard workshops of Hawai'i, California, and Australia are much more than sites of surfboard manufacturing. They are hives of creativity where legacies of rich cultural heritage and the local environment combine to produce unique, bold board designs customized to suit prevailing waves. The globalization and corporatization of surfing have presented small, independent board makers with many challenges stemming from the wide availability of cheap, mass-produced boards and the influx of new surfers. The authors follow the story of board makers who have survived these challenges and stayed true to their calling by keeping the

mythology and creativity of board making alive. In addition, they explore the heritage of the craft, the secrets of custom board production, the role of local geography in shaping board styles, and the survival of hand-crafting skills. From the old boards of ancient Hawaiian kahuna to the high-tech designs that represent the current state of the industry, *Surfing Places, Surfboard Makers* offers an entrée into the world of surfboard making that will find an eager audience among researchers and students of Pacific culture, history, geography, and economics, as well as surfing enthusiasts.

What's the favorite four-letter word of people who are less than fully organized? "Help!" So many technological, social, and economic changes affect your life that you need organization just to keep up, let alone advance. Many people have two jobs - one at the office and one taking care of things at home. If you have a family, you may count that as a third job. Caring for elderly relatives or have community commitments? You can count off four, five, and keep right on going. No matter what life stage you're in, getting organized can make every day better and help you achieve your long-term goals. *Organizing For Dummies* is for anyone who wants to Polish his or her professional reputation Experience less stress Increase productivity Build better relationships Maximize personal time Organization isn't inherited. With

the human genome decoded, the evidence is clear: DNA strings dedicated to putting things into place and managing your time like a pro are nonexistent. Instead, organization is a learned skill set. *Organizing For Dummies* helps you gain that skill with topics such as: Understanding how clutter costs you in time, money, and health
Training your mind to be organized and developing a plan
Cleaning house, room by room, from basement to attic (including the garage)
Creating functional space for efficiency and storage
Time-management strategies for home, office, and travel
Scheduling, delegating, and multitasking
Making time for your family
Managing your health - physical and financial
Finding time for love
Organizing and cashing in on a great garage sale
Getting organized is about unstuffing your life, clearing out the dead weight in places from your closet to your calendar to your computer, and then installing systems that keep the good stuff in its place. Organizing is a liberating and enlightening experience that can enhance your effectiveness and lessen your stress every day - and it's all yours simply for saying "No" to clutter.

This up-to-the-minute guide helps you become more proactive and meet the growing demand for integrated audit services in the 21st century. Wide-ranging in scope, *Information Technology Audits* offers expert analysis, practical tools, and real-world techniques designed to assist in

preparing for and performing integrated IT audits. Written by a seasoned auditor with more than 22 years of IT audit experience, Information Technology Audits provides the first practical, hands-on look at how organizations use and control information to meet business objectives, and offers strategies to assess whether the company's controls adequately protect its information systems. Practice aids are available on a free companion CD-ROM.

This third edition prepares entrepreneurs for the rewards and pitfalls of this career choice. It explores a new theme on how to effectively manage a start-up company. Focus on Real Entrepreneurs sections highlight how entrepreneurs position their companies to meet the various marketing, financial, and technological challenges. Management Track sections present key management issues while following the development of a real company. Entrepreneurs will also find real situations and examples on which they can practice the broad range of skills required to start and build a company in today's complex world.

Digital media present opportunities for new types of consumption including desiring, buying, collecting, making, and even selling digital virtual goods. To these activities we can add those taking place in virtual communities of consumption, online shops, brand websites, and online auction houses that together amount to a vast new landscape of consumption. Digital virtual consumption motivates concatenated practices which produce meaningful experience for their users as well as market

opportunities to profit from them. Consumers create and maintain elaborate wish lists, engaging with simulations of brands on websites and in videogames, coveting items for use in online games and even spending 'real' money on these, undertaking entrepreneurial activity in virtual worlds, conjuring nostalgia via online auctions, engaging in playful consumption in other new retail formats, writing reviews of products as part of the consumption experience, engaging in online activist activities, and many other emerging behaviors. Analyses of consumption in the digital virtual realm are however limited. This collection brings together experienced researchers from the fields of consumer research, digital games, and virtual worlds to provide conceptual and empirical work that helps us understand these new and significant consumer activities. Online communities negotiate the 'correct' use of goods and offer technical advice, consumers develop new products, individuals create and distribute their own promotional material for their favorite brands, and entrepreneurial consumers marketing and selling their own products online. Here we may see a blurring of consumption and production, or work and leisure activity that requires further thought about what makes it meaningful for individuals. The chapters in this volume take stock of the emergence and likely importance of digital virtual consumption for consumer culture, including a review of both new and existing conceptual and methodological tools as well as a resource of key

examples and analyses of practices.

A popular series of guidebooks for the modern-day traveler offering information on cities and countries around the world continues, presenting up-to-date backgrounds and descriptions, detailed maps, hundreds of photographs, and much more, including walking and driving tours, visitor information directories, and cultural sidebars.

A comprehensive guide to the Web's more than five thousand sites is broken down into thirty major subject areas and provides up-to-date information on browsers, connectivity, and visuals of WWW home pages. Original. (All Users)

This book is a must read for all East Coast surfers who may have felt at sometime that they should apologize for where they are from. The stories and pictures in this book are sure to

make the East Coast surfer proud, while sharing a universal story line with surfers all around the world. These stories could very well have taken place in Hawaii or California but, they didnt. The major theme is an eighteen-mile barrier island off the New Jersey coastline known as Long Beach Island (LBI). Every individual in this book is somehow connected to the island. Through a series of short stories from the 1930s to the 21st Century, you will be moved by what these individuals have accomplished in the surfing community as well as the real world. Turn the pages to find out who is an innovator of snowboard technology; a photo editor for Surfer magazine; writer/producer of a Nickelodeon cartoon; and an award recipient from the president of the United States. Meet local surfing legends: Wimpy, Tinker, and Huckleberry. Find out what surfing pioneers did in the days before surfing wetsuits and wax. Travel around the world and through time for: Surfing in Vietnam during the Vietnam War; Running a surf hostile in Puerto Rico in the 1990s; Capturing storm surf on film for the last twenty years from all over the globe. Learn what unique surfing product came to a local surfer in a dream and how the internationally known franchise - Ron Jon Surf Shop, got its start on LBI. Youre sure to enjoy the Why We Surf section with unedited material from our local surfers, ages fifteen to sixty-three. Hear about some of their most memorable surfing experiences and gain their deepest insights about this incredible sport and lifestyle. The book has over one hundred pictures from family collections, 60s surf magazines, and professional portfolios of some of the top surfing photographers. Surfing collectors will especially enjoy some of the vintage material. Surfing the Web will give you the links you need for everything from weather information to

lodging on LBI. For those of you who are still learning about LBI, Local Breaks gives you the low-down about surfing conditions and even parking. There is something in Surfing LBI for surfers of every age and level of expertise. Its a feel good book that will leave you stoked every time you open it. This June 2010 version is the most up-to-date travel guide to Nicaragua available anywhere. With this guide you can: - Surf hidden breaks uncovered by local surfers - Summit active volcanoes, zipline over lush rainforest, sit and sip at one of the country's many organic coffee farms, or hang your hammock in a remote Caribbean village - Float through the pristine rain forest that lines the Rio San Juan, tracing the Costa Rican border from Lake Nicaragua to the Caribbean Sea. - Navigate the border crossings with Costa Rica and get around Nicaragua by bus, boat and puddle jumper airplane - Understand the Nicaraguan people and how you can help them live a better life by traveling responsibly - Stay a while volunteering or studying Spanish in Granada, Ometepe, San Juan del Sur or Leon Why settle for an outdated guidebook? 'eMarketing eXcellence' offers an exciting new approach to help you build a customer-driven e-business. As the core text for the CIM's E-marketing award, the book offers a highly structured and accessible guide to a critical subject, providing a useful reference point for all students and managers involved in marketing strategy and implementation. A practical guide to creating and executing e-marketing plans, this book combines established approaches to marketing planning with the creative

use of new e-models and e-tools. It is designed to support both marketers who are integrating e-marketing into their existing marketing and communications strategies and experienced e-marketers looking to optimise their e-marketing. The book shows how to:

- Draw up an outline e-marketing plan
- Evaluate and apply e-marketing principles & models
- Integrate online and offline communications
- Implement customer-driven e-marketing
- Reduce costly trial and error
- Measure and enhance your e-marketing
- Drive your e-business forward

As the core text for the CIM's new professional E-marketing Award, it provides comprehensive, critical coverage of the key areas of e-marketing planning for marketing professionals. Established marketing concepts such as customer relationship management, the marketing mix and the widely adopted SOSTAC® planning system, are re-examined in the new media context - and new approaches are defined, including business models, traffic building and web site design.
