A pioneering researcher's illuminating account of Arctic ice—its secret history and dire future Barely inhabited, the Arctic is an alien world to most of us. It also holds critical clues about the future of our planet. In *The Hidden Life of Ice*, Marco Tedesco invites us to Greenland, where he and his fellow scientists are doggedly researching the dramatic changes afoot. Following the arc of his typical day at work, Tedesco unearths the secrets in the ice—from evidence of long-extinct “polar camels” to the fantastically weird microorganisms living at freezing temperatures in cryoconite holes. Tedesco weaves together the bald facts on climate change with poetic reflections on this endangered landscape, the epic deeds of great Arctic explorers, and the legends of the rare local populations. *The Hidden Life of Ice* is more than a diatribe on climate—it's a moving tribute to a beautiful place that may be gone too soon.

“I resisted, but she drew me back. I stayed away, but she beckoned me. I distanced myself, but she haunted me. I even rejected her but she did not abandon me...” This work of nonfiction is divided into chapters in which the reader experiences aspects of art, culture, history and the present through the eyes of the writer and of the inhabitants of Rome, past and present. *Show Less She Seduced Me* is that rare book in which the reader becomes part of a magical world in which places, monuments and artists come alive through their stories. In this case, however, that world is Rome and the reader becomes a participant in the ebb and flow of the city and gains insight into why so many have fallen in love with Rome despite its faults. The journey commences with the reader accompanying the author who, standing in front of Michelangelo's Moses statue, mouth agape, almost hears the artist scream at his creation: “Speak!” From this an odyssey of wonder begins: what is the story behind the Trevi fountain, behind that rock in the middle of the Roman Forum, behind all those priests and nuns everywhere, behind everything one stumbles upon, wonders about and takes selfies in front of? The quest is to uncover those stories. Author and reader continue to explore the life in the piazzas, experience camaraderie with street performers, see history through all the senses, get lost in Rome, observe Americans and foreigners, discover unique places to eat, speak with Romans, explore the houses of Nero, Augustus and Livia, encounter Caravaggio and chats with expats. This work is a virtual tour through a magical city that educates and enthralls. Julie Tedesco, LPC explains, “I have always loved quotes and images. They help me make sense of the world - frequently nodding my head ah, now I get it. I thought that by sharing some of my favorite quotes, maybe I could help change a thought, an outlook, or make someone's life a bit easier.” Features 30 inspirational quotes and 30 full-color photos.

Castelnuovo-Tedesco was a popular composer of film and classical music whose reputation continues to grow since his death in 1968. This extensive biography includes a gold mine of fact, history, opinion and personal reminiscence. It is augmented by a list of his guitar works and their publishers as well as a discography.

In the world of municipal politics, truth is stranger than fiction, and there is no truth stranger than La Blanca Gente, Colorado. Tedesco weaves between the anecdotal and the academic to unveil the tactics government employees employ to achieve their own ends.

This fascinating memoir begins with the author leaving his home in California at the age of nineteen to enter a seminary on the outskirts of Rome. The seminary has a resident "saint" who is later discovered to be far more human than spiritual. The author struggled to be faithful to his commitment by suppressing his emotional needs, and thought about changing his life, but eventually ended up at the North American College, the premier American seminary at the Vatican. Sexual identity became an issue for him and many other within the seminary walls. This identity crisis reflected a greater conflict between the spiritual and the human: could he be a truly spiritual person while he was at war with himself? Mark Tedesco entered the seminary in 1978, was ordained in 1988 and served in the priesthood until 1994. But he slowly began to realize that in order to be a complete person, he would have to leave the priesthood and find his own way. He finally understood what it meant to embrace all of his past, all of his experiences, both good and bad. He came to accept that the flesh and the spirit do not have to be at war. This is the engrossing story of the one man's struggle with himself and the church, resulting in a redemptive happiness and peace. It deals with such questions as the search for meaning,

spirituality versus humanity, faith in God and being gay.

A simple request opens up a savory mystery. Hannah never imagined her high school service project with the elderly would draw her into another mystery. Mrs. Tedesco, a lonely widow who loves to bake, has just one request - that the teen retrieve her cookbook from her old house. Easier said than done. The house has been ransacked and the coveted cookbook is nowhere to be found. Eager to help the woman, Hannah and her sister, Tamar, are driven to locate the cookbook and uncover its secrets. But the teens aren't the only ones seeking the cookbook's hidden treasures, and the other side is playing for keeps.

Structural Dynamics: Theory and Applications provides readers with an understanding of the dynamic response of structures and the analytical tools to determine such responses. This comprehensive text demonstrates how modern theories and solution techniques can be applied to a large variety of practical, real-world problems. As computers play a more significant role in this field, the authors emphasize discrete methods of analysis and numerical solution techniques throughout the text. Features: covers a wide range of topics with practical applications, provides comprehensive treatment of discrete methods of analysis, emphasizes the mathematical modeling of structures, and includes principles and solution techniques of relevance to engineering mechanics, civil, mechanical and aerospace engineering.

Usability testing and user experience research typically take place in a controlled lab with small groups. While this type of testing is essential to user experience design, more companies are also looking to test large sample sizes to be able compare data according to specific user populations and see how their experiences differ across user groups. But few usability professionals have experience in setting up these studies, analyzing the data, and presenting it in effective ways. Online usability testing offers the solution by allowing testers to elicit feedback simultaneously from 1,000s of users. Beyond the Usability Lab offers tried and tested methodologies for conducting online usability studies. It gives practitioners the guidance they need to collect a wealth of data through cost-effective, efficient, and reliable practices. The reader will develop a solid understanding of the capabilities of online usability testing, when it's

For most of us, the Arctic is a vast, alien landscape; for research scientist Marco Tedesco, it is his laboratory, his life's work—and the most beautiful, most endangered place on Earth. Marco Tedesco is a world-leading expert on Arctic ice decline and climate change. In *The Hidden Life of Ice*, he invites us to Greenland, where he and his fellow scientists are doggedly researching the dramatic changes afoot. Following the arc of his typical day in the field, he unearths the surprising secrets just beneath the icy surface—from evidence of long-extinct “polar camels” to the fantastically weird microorganisms that live in freezing cryoconite holes—as well as critical clues about the future of our planet. Not just a student of its secrets, Tedesco is an acolyte of the Arctic's beauty—its “magnificence and fragility,” as Elizabeth Kolbert writes in her foreword. Alongside the sobering facts on climate change, Tedesco shares stunning photographs of this surreal landscape— as well as captivating legends of Greenland's earliest local populations, epic deeds of long-ago Arctic explorers, and his own moving reflections. This is an urgent tribute to an awe-inspiring place that may be gone all too soon.

Poetry expressing passion, love, hope and faith. Intense yet simple verses which reach within the human spirit and hint at the greatness of the human heart. Tedesco's poetry is captivating because it emanates from his humanity as he grapples with those questions that are at the very core of human experience. "In the rhythm of rhymes, simple and caressing like a tender folksong that now and again opens on to a boundless horizon, Mark Tedesco looks not for adjectives or metaphors but for the direct meaning of love, love that embraces life in memories and in the present moment, bursting forth into a longing for the other, a search for the Other." - Alessandro Tenaglia, Ph.D "Mark Tedesco's poems are so much more than beautifully penned poetry. They reveal the deepest and often most elusive expressions of the heart!" -Tony McEwing, Fox

This book offers a new approach to the democratisation process and economic adjustment in Argentina during the 1970s. The objective of the book is to provide the key to understanding the changes undergone by the state and economy in the country. Steven G. Estrella offers information about the works of the Italian-born American composer Mario Castelnuovo-Tedesco (1895-1968). The information is provided as part of Dr. Estrella's Incredibly Abridged Dictionary of Composers. Castelnuovo-Tedesco composed sacred music, operas, orchestral works, guitar pieces, and choral works. A list of Castelnuovo-Tedesco's works and a bibliography on the composer are available. Links to other related Web sites are offered.

An autograph card of Mario Castelnuovo-Tedesco, written to Robert Raphael.

Over the years we have been used to seeing guitar works that immediately adapt perfectly to the instrument because of the maturity it has achieved, composers no longer consider it as a situational and exotic nuance in their repertoire but, an important element like woodwinds or strings. Andrés Segovia was still on the rise and, with him, the guitar and his repertoire. Among the composers who wrote for his hands we find: Heitor Villa-Lobos, Joaquin Rodrigo, Manuel Ponce, Alexandre Dumas, Joaquin Turina and finally Mario Castelnuovo-Tedesco who, for the guitar, wrote among the most beautiful pages of music. But the times were still not very mature and there was not a deep awareness of the possibilities and the limitations of the instrument so young, so the first sketch of the music written for guitar (even by these great composers that often wrote for guitarists) were difficult if not impossible to perform and, even graver, not idiomatic. In this regard, Segovia answered

unscrupulously, improvising himself as co-composer of the passages dedicated to him, eliminating what he did not like and adding his own, often to the detriment of the composer's voice and expressive intentions. This led to the other performers unconsciously playing the music in versions heavily revised by Segovia as they were the only ones to be made public, ignoring the most genuine ideas that the composers wanted to express in his music. Two pieces are an icon of this situation: the Capriccio Diabolico (Omaggio a Paganini) and the Tarantella whose manuscripts have been exhumed recently. Angelo Gilardino: teacher, guitarist, composer and friend of Mario Castelnuovo-Tedesco.

This paper will examine how fascism affected the vocal works of Mario Castelnuovo-Tedesco and Guido Alberto Fano. In examining these vocal works, this paper will show how the works of these two composers were affected by their persecution of Jews in Italy leading up to and during the Holocaust, and the ways in which they maintained their Jewish identity with music despite widespread Jewish strife and the betrayal of their birthplace.
