

That All May Flourish

What Keeps Us from Flourishing? We all long to live out our faith with daily joy, but so often that joy eludes us. Why is that? More often than we realize, it's because we've absorbed messages that curve us in on ourselves. These messages have even crept into the church, disguised as truth. It's time we learn to discern teaching that's toxic from that which is true and pure. Flourish equips us with tools to identify the lies that come at us about where to find real life. As we dig deep into what God says in his Word, we will learn to discern the worldly influences that threaten to warp our understanding of what it really means to be a Christian, and emerge with a faith that flourishes—full of the abundant life Jesus promises.

Two common temptations lure us away from abundant living—withdrawing into safety or grasping for power. True flourishing, says Andy Crouch, travels down an unexpected path—being both strong and weak. Regardless of your stage or role in life, here is a way of love and risk so that we all, even the most vulnerable, can flourish.

A NEW YORK TIMES BESTSELLER! AS HEARD ON NPR MORNING EDITION AND ON BEING WITH KRISTA TIPPETT "Katherine May opens up exactly what I and so many need to hear but haven't known how to name." —Krista Tippett, On Being "Every bit as beautiful and healing as the season itself. . . . This is truly a beautiful book." —Elizabeth Gilbert "Proves that there is grace in letting go, stepping back and giving yourself time to repair in the dark...May is a clear-eyed observer and her language is steady, honest and accurate—capturing the sense, the beauty and the latent power of our resting landscapes." —Wall Street Journal An intimate, revelatory book exploring the ways we can care for and repair ourselves when life knocks us down. Sometimes you slip through the cracks: unforeseen circumstances like an abrupt illness, the death of a loved one, a break up, or a job loss can derail a life. These periods of dislocation can be lonely and unexpected. For May, her husband fell ill, her son stopped attending school, and her own medical issues led her to leave a demanding job. Wintering explores how she not only endured this painful time, but embraced the singular opportunities it offered. A moving personal narrative shot through with lessons from literature, mythology, and the natural world, May's story offers instruction on the transformative power of rest and retreat. Illumination emerges from many sources: solstice celebrations and dormice hibernation, C.S. Lewis and Sylvia Plath, swimming in icy waters and sailing arctic seas. Ultimately Wintering invites us to change how we relate to our own fallow times. May models an active acceptance of sadness and finds nourishment in deep retreat, joy in the hushed beauty of winter, and encouragement in understanding life as cyclical, not linear. A secular mystic, May forms a guiding philosophy for transforming the hardships that arise before the ushering in of a new season.

Learning to Flourish offers a lucid, penetrating, philosophical exploration of liberal learning: a still-evolving tradition of theory and practice that has dominated and sustained intellectual life and learning in much of the globe for two millennia. Daniel R. DeNicola weighs the views of both advocates and critics of the liberal arts, and interprets liberal education as aimed supremely at understanding and living a good life, as a vital tradition generating five competing but complementary paradigms that transcend theories of curriculum and pedagogy and are manifested in particular social contexts. He examines the transformative power of liberal education and its relation to such values as freedom, autonomy, and democracy, reflecting on the importance of intrinsic value and moral understanding. Finally, he considers age-old obstacles and current threats to liberal education, ultimately asserting its value for and urgent need in a global, pluralistic, technologically advanced society. Offering a bold yet nuanced theory of liberal education, this study will be of great interest to educators as well as those specializing in Philosophy of Education.

What should Christ's injunction to 'love your neighbour' mean in practice today? A team of leading theologians and practitioners explores this question and considers its bearing on the politics of poverty, discrimination, immigration, ecology and the fallout from recent political upheavals in Europe and America.

As the echo of our Judeo-Christian heritage and advantages of previous generations fade, our incomes stagnate, debt explodes, and fitness wanes. China ascends and vital habitats deteriorate. Worst of all, by failing to convey critical perspectives and practices to our children, we place them in a weaker position than the previous generation for the first time in our history. The author compares how Americans are doing relative to other populations, documents how we lost our way, and describes the cards nature deals us. He contrasts our instinctual operating system with the one needed for success in the modern world, reminds us of our need to be evolutionarily fit, and most importantly, delineates the Winning Practices that make this possible.

Explains the four pillars of well-being--meaning and purpose, positive emotions, relationships, and accomplishment--placing emphasis on meaning and purpose as the most important for achieving a life of fulfillment.

"The ancient Greeks argued that the best life was filled with beauty, truth, justice, play and love. The mathematician Francis Su knows just where to find them."--Kevin Hartnett, *Quanta Magazine*" This is perhaps the most important mathematics book of our time. Francis Su shows mathematics is an experience of the mind and, most important, of the heart."--James Tanton, Global Math Project For mathematician Francis Su, a society without mathematical affection is like a city without concerts, parks, or museums. To miss out on mathematics is to live without experiencing some of humanity's most beautiful ideas. In this profound book, written for a wide audience but especially for those disenchanted by their past experiences, an award-winning mathematician and educator weaves parables, puzzles, and personal reflections to show how mathematics meets basic human desires--such as for play, beauty, freedom, justice, and love--and cultivates virtues essential for human flourishing. These desires and virtues, and the stories told here, reveal how mathematics is intimately tied to being human. Some lessons emerge from those who have struggled, including philosopher Simone Weil, whose own mathematical contributions were overshadowed by her brother's, and Christopher Jackson, who discovered mathematics as an inmate in a federal prison. Christopher's letters to the author appear throughout the book and show how this intellectual pursuit can--and must--be open to all.

The New York Times bestselling author of *Wintering* writes a life-affirming exploration of wild landscapes, what it means to be different and, above all, how

we can all learn to make peace with our own unquiet minds . . . In anticipation of her 38th birthday, Katherine May set out to walk the 630-mile South West Coast Path. She wanted time alone, in nature, to understand why she had stopped coping with everyday life; why motherhood had been so overwhelming and isolating; and why the world felt full of expectations she couldn't meet. She was also reeling from a chance encounter with a voice on the radio that sparked her realisation that she might have Asperger's Syndrome. And so begins a trek along the ruggedly beautiful but difficult path by the sea that takes readers through the alternately frustrating, funny, and enlightening experience of re-awakening to the world around us... The Electricity of Every Living Thing sees Katherine come to terms with that diagnosis leading her to re-evaluate her life so far -- with a much kinder, more forgiving eye. We bear witness to a new understanding that finally allows her to be different rather than simply awkward, arrogant or unfeeling. The physical and psychological journeys of this joyous and inspiring book become inextricably entwined, and as Katherine finds her way across the untameable coast, we learn alongside her how to find our way back to our own true selves.

God likes watching things grow. The metaphor of God as Gardener plays out through Scripture as He tends His people with care, skill, and intention. When Jesus began His ministry on earth, He took this idea to whole new level, revealing that He himself is the Vine. He invites us to the sacred ground of abiding, calling us to flourish in the abundant life He offers. In these beautiful reflections based on Beth Moore ' s bestselling book Chasing Vines, Beth invites you to explore the fruitful life through the language of the garden—and through the words of the Master Gardener Himself.

Can humans flourish without destroying the earth? In this book, experts on many of the world's major and minor religious traditions address the question of human and earth flourishing. Each chapter considers specific religious ideas and specific environmental harms. Chapters are paired and the authors work in dialogue with one another. Taken together, the chapters reveal that the question of flourishing is deceptively simple. Most would agree that humans should flourish without destroying the earth. But not all humans have equal opportunities to flourish. Additionally, on a basic physical level any human flourishing must, of necessity, cause some harm. These considerations of the price and distribution of flourishing raise unique questions about the status of humans and nature. This book represents a step toward reconciliation: that people and their ecosystems may live in peace, that people from different religious worldviews may engage in productive dialogue; in short, that all may flourish.

A Biblical guide to a life of growth and lasting fruitfulness, this book integrates David's life with Aimée's own journey and the attributes of three 'flourishing trees' found in the Psalms.
