The anthology presents a selection of methodological writings published by Polish logicians after World War 11 (the first of them dated 1947). All the papers belong to what may be called Logical Methodology or Logical Theory of Science. The epithet

Acces PDF

Twenty Five Years

In Action With The

*'logical' characterizes
rather the general*

*point of view than the
particular methods*

employed by the

authors. Apart from

articles which make

an essential use of

different formal

(logical and

mathematical)

methods, there are

many which do not

involve any formal

Acces PDF

Twenty Five Years

apparatus

whatsoever. The

problems the papers

deal with may be

characterized as

problems of the

general methodology

of empirical science.

The papers do not

consider the

methodological

problems of formal

(mathematical)

knowledge, and, as a

Acces PDF

Twenty Five Years

In Action With The

rule, they are

concerned with

empirical science as a

whole and not with

some of its specific

branches. The topics

covered by the

selected writings

include the main

issues and

controversies

discussed within the

contemporary

methodology of

science. A

*considerable part of
the anthology is con
cerned with the*

semantics of

empirica1 languages

and considers

problems such as

interpretation of

observational and

theoretical terms,

analyticity, empirical

meaningfulness, etc.

Another group of

Acces PDF

Twenty Five Years

In Action With The

*papers deals with the
problem of induction*

*and examines various
ways of its*

justification. Some

articles discuss the

*nature and the status
of methodology itself.*
