Do you really know God? You may know about God, but do you truly know what He says about Himself--and what He wants from you? This eye-opening study will help you gain a true understanding of God's character and His ways. As you discover for yourself who He is, you'll be drawn into a deeper, more personal relationship with the God of the universe--a relationship that will enable you to confidently display His strength in life's most challenging circumstances. 40 minutes a week could change your life! The 40-Minute Bible Studies series from the teaching team at Precepts Ministries International tackles the topics that matter to you. These inductive study guides, designed to be completed in just six 40-minutes

lessons with no homework required, help you discover for yourself what God says and how it applies to your life today. With the leader's note and Bible passages included right in the book, each self-contained study is a powerful resource for personal growth and small-group discussion.

There's nothing more frustrating than watching your bright, talented son or daughter struggle with everyday tasks like finishing homework, putting away toys, or following instructions at school. Your "smart but scattered" 4- to 13-year-old might also have trouble coping with disappointment or managing anger. Drs. Peg Dawson and Richard Guare have great news: there's a

lot you can do to help. The latest research in child development shows that many kids who have the brain and heart to succeed lack or lag behind in crucial "executive skills"--the fundamental habits of mind required for getting organized, staying focused, and controlling impulses and emotions. Learn easy-to-follow steps to identify your child's strengths and weaknesses, use activities and techniques proven to boost specific skills, and problem-solve daily routines. Helpful worksheets and forms can be downloaded and printed in a convenient 8 1/2" x 11" size. Small changes can add up to big improvements--this empowering book shows how. In this updated edition, Cathy Vatterott examines the role homework has played in the culture of schooling over the years; how such factors as family life, the media, and "homework gap" issues based on shifting demographics have affected the homework controversy; and what recent research as well as common sense tell us about the effects of homework on student learning. She also

explores how the current homework debate has been reshaped by forces including the Common Core, a pervasive media and technology presence, the mass hysteria of "achievement culture," and the increasing shift to standards-based and formative assessment. The best way to address the homework controversy is not to eliminate homework. Instead, the author urges educators to replace the old paradigm (characterized by long-standing cultural beliefs, moralistic views, and behaviorist philosophy) with a new paradigm based on the following elements: Designing high-quality homework tasks; Differentiating homework tasks; Deemphasizing grading of homework; Improving homework completion;

and implementing homework support programs.

Numerous examples from teachers and schools illustrate the new paradigm in action, and readers will find useful new tools to start them on their own journey. The end product is homework that works—for all students, at all levels.

*Statistical Rethinking: A Bayesian Course with Examples in R and Stan* builds readers' knowledge of and confidence in statistical modeling. Reflecting the need for even minor programming in today's model-based statistics, the book pushes readers to perform step-by-step calculations that are usually automated. This unique computational approach ensures that readers understand enough of the details to make reasonable choices and interpretations in their own modeling work. The text presents generalized linear multilevel models from a Bayesian perspective, relying on a simple logical interpretation of Bayesian probability and maximum entropy. It covers from the basics of regression to multilevel models. The author also discusses measurement

*don't? In The Homework Myth, nationally known educator and parenting expert Alfie Kohn systematically examines the usual defenses of homework--that it promotes higher achievement, "reinforces" learning, and teaches study skills and responsibility. None of these assumptions, he shows, actually passes the test of research, logic, or experience. So why do we continue to administer this modern cod liver oil -- or even demand a larger dose? Kohn's incisive analysis reveals how a mistrust of children, a set of misconceptions about learning, and a misguided focus on competitiveness have all left our kids with less free time and our families with more conflict. wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research. At last, the solution for getting disorganized boys back on track. Missed assignments. Lack of focus and enthusiasm.

Falling grades. For too many boys and their frustrated parents, these are the facts of life. But they don't have to be. Top academic counselor Ana Homayoun has helped turn even the most disorganized, scattered, and unfocused boys into successful young people who consistently meet their personal and academic challenges. She does this by getting back to basics--starting with a simple fact: Most boys needs to be taught how to get organized, how to study, and-- most important--how to visualize, embrace and meet their own goals. With an accessible and no-nonsense approach, Homayoun shows how to:
